Visual Studio Code documentation

Get familiar with Visual Studio Code and learn how to code faster with AI.

Getting started

Set up Visual Studio Code

Follow the setup guide to install and configure VS Code for your OS.

(</docs/setup/setup-overview>)

Getting started

Discover the key features of VS Code with the step-by-step tutorial.

(</docs/getstarted/getting-started>)

Code faster with AI

Get started with GitHub Copilot, your AI coding assistant.

(/docs/copilot/getting-started)

Code with rich features

Code in any language

Write code in your favorite programming language.

(/docs/languages/overview)

Version control

Built-in support for git and many other source control providers.

(/docs/sourcecontrol/overview)

Debugging

Debug your code without leaving your editor.

(/docs/editor/debugging)

Testing

Run automated tests and view test coverage to validate your code.

(/docs/editor/testing)

Code anywhere

Use a container, remote machine, or WSL as your development environment.

(/docs/remote/remote-overview)

Videos

Watch the introduction videos to learn more.

(/docs/getstarted/introvideos)

Top Extensions

Enable additional languages, themes, debuggers, commands, and more. VS Code's growing community shares their secret sauce to improve your workflow.

Privacy

By default, VS Code auto-updates to new versions, and collects usage data and crash report information. You may opt out of these defaults by disabling them as instructed below:

[How do I disable auto update? \(/docs/supporting/faq#_how-do-i-opt-out-of-vs-code-autoupdates\)](/docs/supporting/faq#_how-do-i-opt-out-of-vs-code-autoupdates).

[How do I disable crash reporting? \(/docs/supporting/faq#_how-to-disable-crash-reporting\)](/docs/supporting/faq#_how-to-disable-crash-reporting).

[How do I disable usage reporting? \(/docs/supporting/faq#_how-to-disable-telemetry-reporting\)](/docs/supporting/faq#_how-to-disable-telemetry-reporting).
